

## Instructions for Participants (coordinators should forward this to all participants):

1. All participants should have a working computer to participate in this workshop
2. Download the 'Canopy' Python distribution for your OS and architecture from here: <https://store.enthought.com/downloads>
3. Install 'Canopy' using following instructions:  
Windows : [http://docs.enthought.com/canopy/quick-start/install\\_windows.html](http://docs.enthought.com/canopy/quick-start/install_windows.html)  
Linux : [http://docs.enthought.com/canopy/quick-start/install\\_linux.html](http://docs.enthought.com/canopy/quick-start/install_linux.html)  
Mac : [http://docs.enthought.com/canopy/quick-start/install\\_macos.html](http://docs.enthought.com/canopy/quick-start/install_macos.html)
4. After installation, run the Canopy application once, to complete the setup
5. Download the data files required for the workshop from this link:  
<http://static.fossee.in/python/1-day-workshop/circulate.zip> (~500 KB)
6. During the workshop, you will follow the video lectures being played on-screen and type hands-on
7. You may ask questions / doubts during the scheduled Q&A sessions
8. Take part in quizzes after each session. The grades you receive on your certificates will be generated based on these quizzes
9. Video number 8 and 10 are additional topics, which the participants can view after the workshop, as per their interest
10. Keep this quick reference guide handy, during the workshop:  
<http://static.fossee.in/python/1-day-workshop/quickref.pdf>
11. Visit <http://yaksh.fossee.in> and register one day prior to the workshop
  - a. You may create a new user account (or)
  - b. You may use your Google Profile to create a new account

- c. Once you have signed up and logged into the Yaksh interface please click on '*My Profile*'
- d. On the '*My Profile*' page, make sure the below details are filled in accurately
  - i. First name
  - ii. Last name
  - iii. Email
  - iv. Institute
  - v. Department
  - vi. Roll number
- e. In case the details are incorrect/missing, edit them by clicking on '*Edit Profile*'
